COLOR CONFIGURATIONS

Personalize your Mercury V10, V8 or V6 outboard with a Color Accent Panel kit. The panels are made of thin, durable polycarbonate and are available in five factory-painted colors, plus a ready-to-paint version – so you can decide what performance looks like.

- Choose Your Color – Each kit includes four painted panels, adhesive backing and installation instructions. *(Included decals vary by engine.)*
- Add Decals – For a factory look and finish, choose the appropriate decal package for your engine's horsepower.
- Install It – Kits are easy to install, and your dealer can help. Estimated dealer installation time is about 30 minutes per engine.

**Replacing an existing Accent Panel kit with a different color kit is NOT recommended.*

All-in-One Spotless Shine by Mercury Marine® is the approved cowl cleaner and detailer for Mercury outboards and Color Accent Panels. It's formulated to leave a like-new, easy-to-maintain shine and protect against future spotting and UV rays. Just spray on and wipe dry. It won't damage paint, finishes, decals or wraps. 2 oz. sample included in panel kits (except Pro Black and ready-for-paint).
